### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The present application relates to an integrated vehicle control system that allows each of a plurality of electronic control units or apparatuses (ECUs) to transmit and receive various data to and from other electronic control units for controlling various functions of a vehicle. The claimed invention sets forth, in combination with other features, that one of such electronic control units functions as an overall control apparatus and determines operation directives supplied to the individual control apparatuses based on information obtained from the individual control apparatuses over at least one communication line, executes abnormality detection processing for detecting abnormality occurring in the integrated vehicle control system, and executes gateway processing by selecting necessary information for a second network and transmitting the selected information via a host network to another overall control apparatus, thereby allowing mutual exchange of information between individual control apparatuses of differently functionalized networks. The aforementioned limitations and combination thereof are not taught in the prior art. In light of the foregoing, the claims of the present application are found to be patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
